

# Example GI Practice – UHC Choice Plus

Gastroenterology · 5 providers · Houston, TX · Prepared from public price-transparency disclosures

SAMPLE PACKET – the market percentiles, Medicare baseline and facility disclosures are real, current Houston data. The example practice and its “your rate” column are illustrative, shown to demonstrate the format. Your packet uses your actual contracted rates.

## 1 EXECUTIVE SUMMARY

Across this practice's 12 highest-volume codes, contracted rates sit below the UHC Choice Plus market median on **10 codes**. Valued at documented annual volumes, the cumulative gap to median is:

\$110,123

annual gap to market median

10/12

codes below median

\$24,750

largest single-code gap

#### 4 REQUESTED FEE SCHEDULE ADJUSTMENT

These are the codes where the practice is currently paid below the disclosed market median. The ask is specific and evidence-backed: adjust each to the market median – the rate UHC Choice Plus already discloses paying comparable groups in this market – effective at contract renewal, rather than a blanket percentage increase. The "Change" column shows the percentage lift from the current rate to that median.

| CODE  | CURRENT | REQUESTED (MARKET MEDIAN) | CHANGE |
|-------|---------|---------------------------|--------|
| 45378 | \$189   | \$272                     | 44%    |
| 45380 | \$215   | \$295                     | 37%    |
| 45385 | \$270   | \$374                     | 38%    |
| 45384 | \$257   | \$336                     | 30%    |
| 43239 | \$153   | \$203                     | 33%    |
| 43235 | \$134   | \$180                     | 34%    |
| 45330 | \$68    | \$82                      | 20%    |
| 43249 | \$177   | \$225                     | 27%    |
| G0121 | \$194   | \$273                     | 41%    |
| G0105 | \$232   | \$272                     | 17%    |

Re: Fee schedule review – Example GI Practice (TIN 76-0000000)

Dear UHC Choice Plus Network Management,

We are writing to request a review of our professional fee schedule ahead of our contract renewal. Using publicly disclosed rate data – negotiated-rate files published under the Transparency in Coverage rule and hospital machine-readable files published under 45 CFR 180 (v3.0, including actual allowed-amount disclosures effective January 2026) – we benchmarked our contracted rates for our 12 highest-volume procedure codes against professional rates paid to comparable gastroenterology groups in the Houston, TX market.

Our current rates fall below the market median on 10 of 12 codes, in several cases below the 10th percentile of rates UHC Choice Plus itself has disclosed for peer groups in this market. At our documented annual volumes, the gap to market median totals approximately \$110,123 per year.

We are requesting an adjustment of the codes listed in Section 4 to the disclosed market median, effective on renewal. The full benchmark tables and methodology are enclosed. We would welcome a call within the next 30 days.

Respectfully,

[Practice Administrator], Example GI Practice

---

Methodology: professional negotiated rates from payer Transparency-in-Coverage in-network files, deduplicated by tax ID × rate and restricted to gastroenterology taxonomy NPIs in target counties via NPPES. Procedures are benchmarked in the facility setting (POS 22/24) and office visits at POS 11, each compared to the matching Medicare column. Market columns are aggregated 10th / 50th / 90th percentile figures across peer groups – no individual practice's identified rates are shown. The annual gap sums, across codes paid below the market median, (median – your rate) × your annual volume; it assumes those codes are renegotiated to the median at the volumes shown and does not net codes already paid above median. Facility context from hospital price-transparency v3.0 files (45 CFR 180). Medicare baseline: CY2026 PFS, Houston locality. All sources are public disclosures mandated by federal rule. Generated by FairRate.
