3 FACILITY-SIDE VALIDATION (2026 ACTUAL-PAID DISCLOSURES)

Separately from the payer negotiation, hospital price-transparency files now disclose the *actual allowed amounts* (median / 10th / 90th percentile, from remittance data) and claim counts for these procedures across DFW facilities. The dollar figures below are institutional facility amounts and are **not** comparable to the professional fees in Section 2 – they are included only to confirm these are high-volume codes that transact at real, documented scale in this market, so the benchmark reflects everyday procedures rather than edge cases. Claim counts are hospital-reported over a 12-15 month window.

CODE	FACILITY	SETTING	MEDIAN ALLOWED	P10-P90	CLAIMS (12-15 MO)
------	----------	---------	----------------	---------	-------------------

4 REQUESTED FEE SCHEDULE ADJUSTMENT

These are the codes where the practice is currently paid below the disclosed market median. The ask is specific and evidence-backed: adjust each to the market median – the rate Aetna Open Access MC already discloses paying comparable groups in this market – effective at contract renewal, rather than a blanket percentage increase. The "Change" column shows the percentage lift from the current rate to that median.

CODE	CURRENT	REQUESTED (MARKET MEDIAN)	CHANGE
11102	\$84	\$107	26%
11104	\$107	\$134	26%
17000	\$60	\$84	39%
17003	\$6	\$8	26%
17110	\$94	\$114	22%
17311	\$539	\$703	30%
17312	\$333	\$419	26%
11602	\$213	\$255	20%
11642	\$226	\$281	24%
12031	\$232	\$252	9%

Re: Fee schedule review – Example Dermatology Practice (TIN 75-0000000)

Dear Aetna Open Access MC Network Management,

We are writing to request a review of our professional fee schedule ahead of our contract renewal. Using publicly disclosed rate data – negotiated-rate files published under the Transparency in Coverage rule and hospital machine-readable files published under 45 CFR 180 (v3.0, including actual allowed-amount disclosures effective January 2026) – we benchmarked our contracted rates for our 12 highest-volume procedure codes against professional rates paid to comparable dermatology groups in the Dallas-Fort Worth, TX market.

Our current rates fall below the market median on 10 of 12 codes, in several cases below the 10th percentile of rates Aetna Open Access MC itself has disclosed for peer groups in this market. At our documented annual volumes, the gap to market median totals approximately \$161,434 per year.

We are requesting an adjustment of the codes listed in Section 4 to the disclosed market median, effective on renewal. The full benchmark tables and methodology are enclosed. We would welcome a call within the next 30 days.

Respectfully,

[Practice Administrator], Example Dermatology Practice

Methodology: professional negotiated rates from payer Transparency-in-Coverage in-network files, deduplicated by tax ID × rate and restricted to dermatology taxonomy NPIs in target counties via NPPES. Procedures are benchmarked in the facility setting (POS 22/24) and office visits at POS 11, each compared to the matching Medicare column. Market columns are aggregated 10th / 50th / 90th percentile figures across peer groups – no individual practice's identified rates are shown. The annual gap sums, across codes paid below the market median, (median – your rate) × your annual volume; it assumes those codes are renegotiated to the median at the volumes shown and does not net codes already paid above median. Facility context from hospital price-transparency v3.0 files (45 CFR 180). Medicare baseline: CY2026 PFS, Dallas locality. All sources are public disclosures mandated by federal rule. Generated by FairRate.
